

Icon Digital Productions Colour Matching & Proof Policy

Colour Matching:

Icon's digital printers conform to the industry standard Pantone Matching System (PMS) or CMYK process colours. Due to the variances in colour interpretation between many digital print technologies currently on the market, designers should refer to Icon's PMS colour charts specific to our printers, for easy colour corrections and matching when preparing files.

Colour Proofs:

In order to expedite orders and minimize production delays, customers are required to supply Icon with appropriate colour proofs (see list below) along with their order. PMS colour values should also be clearly indicated on proofs.

Acceptable Colour Proofs:

Contract/Press proofs, IRIS prints, dye-sublimation or calibrated colour lasers are acceptable.

Additional Costs:

Upon request Icon can provide you with a colour proof at a \$75.00 per proof. If colour correction time is required, it will be charged at \$125.00 per hour.

For the customer:

I cannot provide Icon with a colour proof or PMS specification(s), therefore please print as per submitted file(s) with no additional charge for a proof. I am aware Icon is NOT responsible for any misrepresentation of colour.

Customer Signature

I agree to have Icon produce a colour proof and realize that I will be invoiced at \$75.00 per proof. I will be notified before hand of any colour corrections and related additional charges.
